

Enterprise Collaboration Platform

Migration METHODOLOGY

The Most Complete, End-to-End Notes/Domino® Application Migration Solution

For years, IBM® Notes® applications have been the driving force behind many businesses, helping them to collaborate and coordinate information critical to their business objectives. No two businesses are the same and Notes applications have helped companies to be competitive in the way that they do business.

However, Notes and Domino have not kept pace with today's modern workforce and it's time to leave. But who can you turn to? Most migration solutions are only partial solutions that aim to set low expectations or encourage you to retire or rebuild your applications, while others direct businesses toward an incompatible Microsoft® SharePoint® environment where high costs and functionality compromises are the order of the day.

It's time to do this right!

At DOCOVA®, we've put in the hard work to create a modern collaboration platform, the migration tools, and a methodology that works. The result is the most complete end-to-end solution on the market for migrating your legacy Notes and Domino environment.

With our rock solid "migration methodology" and advanced tools and platform, let our migration experts help transform your business by driving down the time, cost and risk of moving off your Notes and Domino environment.

The DOCOVA Notes/Domino® Migration METHODOLOGY™

DOCOVA's Migration Methodology leverages a framework and set of powerful tools for analyzing, planning, migrating and managing the entire transition off your legacy Notes and Domino environment.

ANALYZE

Our application analysis tools are geared toward delivering information specific to the DOCOVA platform like no other, helping drive down time, costs and risk.

PLAN

Create your migration strategy with **Your Plan**, a planning tool used to organize and set in motion a plan that suits your needs as an organization, aiming to mitigate risks and control costs associated with this complex project.

MIGRATE

Being the most Notes compatible platform means less time, less cost, less training, less risk, and no process re-engineering when migrating your Notes apps. Our migration tools are extensive, migrating everything from user interface, security and business logic to database schema and data.

MANAGE

Modify and update migrated apps, create new apps and administer and manage them moving forward on the DOCOVA enterprise collaboration platform.

Partner with DOCOVA's team of migration experts to do this right.

Your success is our success.
