

Docova Extends Mobility with BlackBerry

Becomes latest integration point for leading Document Management solution for Lotus Domino

April 26, 2010. Burlington, Ontario. DLI.tools Inc is pleased to announce the General Availability of the Docova BlackBerry Connector v1.0 for their award-winning Document and Content Management solution, Docova Document Manager.

Developed in response to customer requests, the Docova BlackBerry Connector will initially allow in-field professionals like sales representatives, service personnel and business executives to view documents stored in Docova from their BlackBerry device.

“Given the popularity of the BlackBerry platform and requests from our customers, we anticipate strong demand for this new product offering,” states Gary Walsh, VP Sales, “the BlackBerry Connector represents another example of extending Document and Content Management beyond the web.”

Future versions of the Connector will extend the Docova user experience to BlackBerry devices. Connectors for other platforms are planned for the second half of 2010.

The BlackBerry Connector is available from Docova.com, with a demo trial version and pricing currently available through a DLI.tools Account Manager or Business Partner. DLI.tools targets the availability of the Connector in the BlackBerry Apps World store for 2010.

About Docova Document Manager

Introduced at Lotusphere 2005, Docova Document Manager is a leading Lotus Domino-based document management alternative for IBM Lotus environments. Docova combines advanced document management functionality with collaboration tools to streamline how your organization manages, automates, and controls documents, files & content in the context of how you work.

Docova is the only document and content management platform to win the Lotus Advisor Editor’s Choice Award three years in a row.
