Docova v2.5.6 released

Docova makes it easier to Organize, Control and Share Documents and other content inside a Web 2.0 world

Quick Facts:

- Docova 2.5.6 provides enhanced functionality & resolves previous bugs
- Docova Collaborative Document Management a leading document management solution for IBM Lotus Notes and Domino environments

Burlington, Ontario, May 15, 2008 – DLI.tools Inc. announced today the general availability of Docova Collaborative Document Management v2.5.6.

The latest release of Docova provides enhancements in over 20 areas of the product, including improved security & privileges controls, system messaging, web printing capabilities, and document searching.

Current customers on Docova Software Assurance can download the latest release in the [Docova Support Center](#), with a video detailing the latest functionality found inside the 'Training' section.

About Docova

Organize, Control and Share the information assets (documents, forms, files, emails) relevant to team collaboration, content sharing, and collaborative & approval processes across practically any server hardware platform. Docova won the Lotus Advisor award for Document Management three years in a row (2005 to 2007) and received finalist recognition for the 2007 Lotus Award at Lotusphere in the Best "Mid Market Solution" category. Experience how easy it can be to leverage your IBM Lotus Domino infrastructure for collaborative document management at www.docova.com/docovademo
